

Title of the Project

SwagZinn – A Social Media

Abstract

When in 3rd Year we were told to build a Minor-Project, the first thing which into my mind is to build an application which we use in our day-to-day lives, like Social Media Application. I always use them and wandered about their whole system works, like so many people use them. So I decided to build one.

Social Media is an Application which includes saving our life moments to the internet & sharing it to the world in the form of post and statuses. It makes people to connect to the world, like what whom is doing & making them to communicate over the internet. Allows authorized users to react & comment on their posts. Providing Saving some valuable posts which holds some value to us. We also can see what was going on all over the trending. It allows us to people connect to the ones they decided, and to control who are allowed to see our posts.

Acknowledgement

It brings me great pleasure to finally complete the minor project in partial fulfillment of the prerequisite for the award of Bachelor computer application. I would like to thank Ms. Parull mam (project in-charge, BCA department) who was involved with me in this project to make it a success. I extend my heartfelt and profound gratitude to my respected faculty members for providing me the impulse to get this work on the ground.
